2.4. Groups and Broadcast Lists

2.5. Audio and Video Calls

3. Guardian Web

1. General Information

Guardian is a secure, in-house communication application with IOS/Android and web versions that provides chat, sharing and audio/video calls between users. When smartphones began to become prevalent everywhere in the early 2010s, chat applications gradually began to replace the mobile communication standard SMS. However, all chat apps exhibit serious security flaws. As the biggest flaw; chat data can be monitored and analyzed by undesired parties. With Guardian, all chat data is kept on your system securely as an on-premise solution.

2. Features

Guardian app has many features; to be able to use all them properly the user should allow app to access camera, microphone, contact list and to send notifications.

2.1. Easy to Register

It is easy to register with your mobile phone number. SMS verification mechanism works on registration to validate the user.

2.2. Text and Voice Messages

Quickly and conveniently the user can send text messages. If there is no time to type, voice messages come in handy. Private message answer, starring, filtering options are also available.

2.3. Files, Media and Locations Sharing

Guardian makes sharing easy for the users. Any kind of sharing is possible with Guardian securely.

2.4. Groups and Broadcast Lists

Groups and distribution lists allow to send messages to multiple recipients at once. Creating groups and collective broadcast lists based on common interests or tasks is possible with Guardian.

2.5. Audio and Video Calls

Make audio and video calls over Guardian. In addition to front / rear camera switch, audio mute / unmute, video pause / resume features, call duration is also provided to the user for calls.

3. Guardian Web

Thanks to Guardian Web, chatting from the desktop is just as secure as using the Guardian app on mobile. The users have full access to their entire chat history as well as all contacts and media files. It is also allowed to have audio and video calls over the web version.
